

Take four toilet paper cores.

Take two cores and cut them in half along the side.
Then cut about 2cm in order to make them shorter
and close it with some tape.
Remember to shrink it a little.

Cover up the four cores with some aluminium foil
(for cooking).

Insert the smaller cores into the big ones.
Then hold them together with a rubber band and cover
it up with a strip of aluminium foil.

And now... look through!!
