

Take an old cardboard box.

Pull up one of the two long shutters and cut it about 12 cm high.

Then fold it on the outside and glue it.

Glue a cardboard sheet on top of the box.

Draw the oven door than cut along the upper sides.

Remember not to cut the lower side in order to be able to close it back again.

Now it's time to draw all the details: stoves, knobs and tiles.

And now.... LET'S START COOKING!!!
